Caverion joins UN Global Compact – for achieving a better world

Our company is now a proud new member of the UN Global Compact (UNGC), the world's largest corporate sustainability initiative.

The Global Compact is a call for companies to align their operations and strategies with ten universally accepted principles in the areas of human rights, labour, environment and anti-corruption.

By signing the Global Compact Caverion is committed to incorporating the initiative and its principles into our strategy and Group culture – and communicating them to our employees, owners, suppliers, partners, customers and the rest of our community.

“In November 2020, we launched our ambitious sustainability targets. Our target by 2030 is to create sustainable impact through our solutions, with a positive carbon handprint 10 times greater than our own carbon footprint. Joining the UNGC tells we really take human rights, labour, environment and anti-corruption issues seriously. Also our customers have high expectations on our operations and sustainable offering. Sustainability will have a key role in our strategy going forward,” says **Thomas Hietto**, Deputy CEO, Head of Caverion Services, Sustainability & Smart City Solutions.

Over 16,000 enterprises and organisations globally have already joined the UN Global Compact.
